DETAILED ACTION

Election/Restrictions

- A. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 71-81, drawn to a method for optimizing a selection of risk management activities, classified in class 705, subclasses 1.
 - II. Claims 82-90, drawn to a program storage device classified in class 700, subclass 28.
 - III. Claims 91-100, drawn to a program storage device classified in class 707, subclass 100.
 - IV. Claims 101-105, drawn to a method classified in class 705, subclasses 35.
 - V. Claims 106-120, drawn to a method and a program storage device classified in class 705, subclass 7.
- B. The inventions are distinct, each from the other because of the following reasons: Inventions I-V are related subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as optimizing risk management activities. Invention II has separate utility such as processing documents online (xml). Invention III has separate utility such as buying and selling securities. Invention IV has separate

utility such as optimizing production schedules. Invention V has separate utility such as optimizing system performance.

- C. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
